

Does τ govern the unsampled-c update sign?

(a) per-position c-alignment vs τ (n=48 positions)
 $\tau > 0$: 57.6% | $\tau \leq 0$: 56.6% toward teacher

(b) per-candidate watershed (n=913 c-tokens)
 $\tau - \pi_c < 0$: 57.3% | $\tau - \pi_c > 0$: 58.1% toward teacher
