

Does τ govern the unsampled-c update sign?

(a) per-position c-alignment vs τ (n=42 positions)
 $\tau > 0$: 46.2% | $\tau \leq 0$: 50.1% toward teacher

(b) per-candidate watershed (n=818 c-tokens)
 $\tau - \pi_c < 0$: 48.6% | $\tau - \pi_c > 0$: 47.0% toward teacher
